High-reliability incubator for hatching of rare birds

Rcom PRO 20

Artificial intelligence incubator

Automatic Temperature & Humidity setting and control

Adjusting the temperature for hatching, are you worried?
Rcom PRO 20, which has been applied AUTOELEX's very one and only long-standing incubation technology carefully checks and adjusts the set temperature and humidity.

Automatic mode for beginner, Manual mode for mania

* **Automatic mode** : This mode offers you the easiest way of incubation conditions.
Users do not need to control or monitor the incubator except to add water.

* **Manual mode** : This mode is used when users are expert at incubation, or when they have to hatch some birds which are not indicated on the incubator. User can set the temperature, humidity, and egg-turning.

Automatic egg-turning and stop function

Rcom PRO 20 automatically adjust the egg-turning according to the setting
and low noise stepping egg-turning motor.

Small egg tray, Standard egg tray, Large egg tray included

A variety of eggs can be hatched at once, as it comes with a small, standard, and large tray that can be used according to the egg size.

* Universal tray, divider, rolling divider sold separately.

Slide plate with embossed feature for preventing skid

The egg-turning plate where the newborn bird steps on is embossed with an anti-slip treatment to prevent leg deformity.

Wide LCD display

LCD display with incubation information, and animation graphic design.

Alarm when water need replenishing and buzzer with abnormal conditions

There is no need to check the water shortage often. Rcom PRO 20 notifies you when water is low, so you can easily determine the condition and alarm sounds when abnormal temperature occurs.

* Incubation data memory function and power outage notification function in case of power failure.

High-reliability incubator for hatching of rare birds

Incubation environment except for general poultry is controlled automatically.

Body locking device

The main body can be easily detached for convenient cleaning.

Double-glazed view window

Double-glazed view window for minimizing the influence of outside temperature.

🐔 Hatchery egg

Hatchery egg means fertilized egg for incubation. Hatchery egg should be fertilized egg, but it does not mean every fertilized egg can be hatched.

Hatching result can be different from egg condition. For being a good hatchery egg, mother birds need to be under good nutritious state.

Also, eggs should be incubated before 7 days passed after laid out. It's better to keep at the place with temperature of 10-16°C and 70% humidity avoiding direct ray of light before start incubation. Eggs with cracks on eggshell, abnormal shape or eggs with contaminated eggshell are not good as hatchery eggs.

Fertilized Egg

Fertilized egg is an egg laid by mating a hen and a cock. So, it can become a chicken.

Unfertilized Egg

Unfertilized egg is an egg we generally eat. As an unfertilized egg is laid by a hen alone, it cannot become a chicken.

SPECIFICATION

Name	Rcom PRO 20
Model NO.	PX-20
Capacity	Small egg tray - Quail egg size 52EA Standard egg tray - Chick egg size 20EA Large egg tray - Goose egg size 10EA
Temp. Control	Automatic
Temp. Limits	20 ~ 42°C / 68 ~ 107.6°F
Humi. Control	Automatic
Humi. Limits	30 ~ 70% (It can be changed according to the conditions)
Egg-turning	Automatic (0 ~ 120, 180, 240 ° range, Different from the species of egg)
Display	LCD
Power	AC 100-120V, 50/60Hz / AC 220-240V, 50/60Hz
Power consumption	MAX. 65W / Average 48W
Size	(W)500 x (L)410 x (H)160mm
Weight	4.7kg(N.W.) / 6kg(G.W)

BASIC PRODUCT INFORMATION

Manufacturer	AUTOELEX CO., LTD.
Country of manufacture	KOREA

- * You will be asking for service charge if you are in below cases.
- Broken or Problem caused by 'No cleaning' or 'Improper handling'
 - Broken or problem caused by 'Not using distilled water'
 - Broken or problem caused by 'Trying Bird brooding in incubator' (Please don't try bird brooding in incubator. Please use Brooder during bird brooding.)
