37.5°C automatic temperature control with AUTOELEX's own temperature technology

Adjusting the temperature for hatching, are you worried?
The microchip of Rcom MINI checks the temperature by 0.1 degrees to meet the detailed incubation conditions.

* Incubation room temperature 22~25°C

Automatic egg-turning and stop function

Rcom MINI automatically adjusts the egg-turning function according to the set bird.
and low-noise stepping egg-turning motor.

Optimum incubation conditions with bird selecting

You can easily set up the incubation environment, and there is no need for additional setup or management other than adding water to maintain humidity.

Large view window to observe eggs

View window for minimizing the influence of outside temperature.

Incubation condition can be checked even in dark places with LED lighting

Incorporated LED internal lighting.

You can incubate various sized eggs

Equipped with a small egg tray, You can hatch up to 7 eggs the size of a quail egg.

Alarm when water need replenishing

There is no need to check the water shortage often,
Rcom mini notifies you when water is low, so you can easily determine the condition.
* Water capacity 100cc

Buzzer with abnormal conditions

60 minutes after the start of incubation -
An alarm sounds when the temperature is less than 30 degrees or
an abnormal temperature exceeds 40 degrees.

Rcom MINI's unique egg candling system "EZ Scope"

You can assemble EZ scope with Rcom MINI incubator and observe the eggs.
EZ scope helps you to monitor the incubation progress with your computer by using webcam.

* EZ scope is sold separately.
* The pictures may be different from actual image.

🐔 Hatchery egg

Hatchery egg means fertilized egg for incubation. Hatchery egg should be fertilized egg, but it does not mean every fertilized egg can be hatched.

Hatching result can be different from egg condition. For being a good hatchery egg, mother birds need to be under good nutritious state.

Also, eggs should be incubated before 7 days passed after laid out. It's better to keep at the place with temperature of 10-16°C and 70% humidity avoiding direct ray of light before start incubation. Eggs with cracks on eggshell, abnormal shape or eggs with contaminated eggshell are not good as hatchery eggs.

Fertilized Egg

Fertilized egg is an egg laid by mating a hen and a cock. So, it can become a chicken.

Unfertilized Egg

Unfertilized egg is an egg we generally eat. As an unfertilized egg is laid by a hen alone, it cannot become a chicken.

SPECIFICATION

Name	Rcom PRO MINI
Model NO.	PX-03
Capacity	Chick egg size 3EA, Quail egg size 7EA (with small egg tray)
Temp. Control	Automatic
Humi. Control	Manual
Egg-turning	Automatic
Display	LCD
Power	12V Adaptor
Power consumption	MAX. 15W / Average 10W
Size	(W)260 x (L)200 x (H)110mm
Weight	1kg(N.W.) / 1.7kg(G.W)

BASIC PRODUCT INFORMATION

Manufacturer	AUTOELEX CO., LTD.
Country of manufacture	KOREA

- * You will be asking for service charge if you are in below cases.
- Broken or Problem caused by 'No cleaning' or 'Improper handling'
 - Broken or problem caused by 'Not using distilled water'
 - Broken or problem caused by 'Trying Bird brooding in incubator' (Please don't try bird brooding in incubator. Please use Brooder during bird brooding.)
 - Broken or problem caused by 'Wrong controlling(Using)'
